

eKashmirTourPackage.com

Build-ready blueprint to become the #1 topical authority in the Kashmir-travel niche

Google SERP • AI Overviews • LLM citations • Max CTR

Prepared for	Developer / SEO / content build team
Site & canonical	https://www.ekashmirtourpackage.com (canonical host = www.; 301 the non-www)
Stack	Next.js — all critical content must be server-rendered (SSR/SSG)
Author of record	Sartaj — born & raised in Kashmir, 20 years in Kashmir tour planning
Business model	Lead-gen + booking. Primary conversion = Get Quote / WhatsApp / Call
Version	1.0 — handoff draft

DATA-HONESTY RULES (non-negotiable — apply to every page)

- Every price, timing, distance and count below is a real 2026 market figure used as an *example data block*. Rates and timings drift — publish only after Sartaj verifies on-ground and tag volatile values **[VERIFY 2026-27]** in the CMS.
- Never publish Review / AggregateRating (star) schema unless genuine, on-page reviews exist — fake rating markup is a domain-wide manual-action risk.
- No thin / doorway / orphan pages. No JS-only critical content. Money pages ≤ 2 clicks from home.

Contents

How to use this SOP

This document is the single source of truth for building the site. Work in two stages, in order: Stage A defines what the site must cover and how it connects (topical map); Stage B is the build — information architecture, per-page specs, internal-link matrix, UX, technical foundation, roadmap and measurement. Do not build a page before the Stage A topical map is signed off.

Before build begins, confirm the four open inputs flagged **[CONFIRM]** / **[VERIFY]** in this document: (1) Sartaj's author profile links (sameAs), (2) J&K Tourism registration for trust signals, (3) genuine on-page reviews before any review schema, (4) current-season prices, fares and temple timings.

Stage A — 360° Market Intelligence + Topical Map

A1. Category & seasonality

Kashmir travel is a year-round but sharply seasonal category. Each seasonal page must already rank 6–8 weeks before its demand peak.

Window	Demand driver	Pages that must already rank
Dec–Feb	Snow / skiing / Gulmarg gondola	Winter/snow package, Gulmarg hub, skiing experience, “Kashmir in December/January” guides
Late Mar–mid Apr	Tulip Festival — biggest annual spike [VERIFY dates yearly]	Tulip Festival page, spring package, best-time guide
Apr–Jun	Honeymoon, family, school holidays (peak)	Honeymoon/family packages, all from-city pages, all destination hubs
Jul–Aug	Amarnath Yatra	Amarnath page (route, registration, Baltal vs Pahalgam), Pahalgam/Sonamarg hubs
Oct–Nov	Autumn Chinar, saffron harvest (Pampore)	Autumn guide, Saffron Festival, photography package

A2. Demand / query universe (the full 360° vertical)

Every cell is a page-cluster to build. Expand each with head + modifiers (best/cheap/luxury/near me/2026/for couples/for family) + questions (what/why/how/when/cost/is-it-safe) + transactional (book/price/quote/fare/hire).

Vertical	Clusters to own
Tour packages (MONEY)	Kashmir tour package · honeymoon · family · group · budget · luxury · adventure/snow · customizable · with flights
By duration (MONEY)	3/4/5/6/7/8/9/10-day & N-night packages · weekend trip · 1-week itinerary
From city (MONEY)	from Delhi · Mumbai · Bengaluru · Hyderabad · Chennai · Kolkata · Ahmedabad · Pune · Jaipur · Chandigarh · Lucknow (with & without airfare)
Destinations (HUB)	Srinagar · Gulmarg · Pahalgam · Sonamarg · Dal Lake · Betaab · Aru · Yusmarg · Doodhpathri · Gurez · Dachigam · Wular · Mughal Gardens
Temples & shrines	Shankaracharya · Kheer Bhawani · Amarnath Cave · Hazratbal · Charar-e-Sharief · Jamia Masjid — each with timings · rituals · dress code · how to reach · entry · history · best time
Festivals	Tulip Festival · Amarnath Yatra · Gulmarg Winter Festival · Shikara Festival · Kheer Bhawani Mela · Saffron Festival · Eid/Navroz · Sufi festivals
Cab / transport (MONEY)	Kashmir cab service · taxi · car rental · tempo traveller · airport transfer · Srinagar→Gulmarg/Pahalgam/Sonamarg fare · full-day sightseeing · self-drive
Hotel & houseboat (MONEY)	Dal Lake houseboats · hotels in Srinagar/Gulmarg/Pahalgam/Sonamarg · luxury resorts · budget stays · homestays · honeymoon hotels
Activities / experiences (MONEY)	Shikara · Gondola · skiing · snowboarding · trekking · rafting · paragliding · ATV · pony rides · camping · angling · golf
Planning (BLOG spokes)	best time to visit · month-by-month weather · itineraries · trip cost/budget · packing · is Kashmir safe · permits · snowfall dates · food (Wazwan) · shopping (pashmina/saffron/dry fruits) · connectivity

A3. Personas, JTBD & decision journey

Persona	Core job-to-be-done	Top objections	Journey entry point
Honeymooners	Cinematic, private, hassle-free romantic trip	Cost transparency, privacy, weather	honeymoon package, houseboat, best time
Families	Safe, well-paced trip for kids + elders	Safety, pace, senior-friendly climbs	family package, itinerary, from-city
Adventure/solo	Skiing, trekking, offbeat valleys	Fitness, permits, guide quality	Gulmarg skiing, trek, Gurez

Persona	Core job-to-be-done	Top objections	Journey entry point
Pilgrims	Amarnath / temple darshan	Registration, route difficulty, timings	Amarnath, Shankaracharya, Kheer Bhawani
Senior groups	Comfortable, low-exertion sightseeing	Accessibility, medical, altitude	senior-friendly tour, cab service
Photographers	Golden-hour access, offbeat frames	Timing, crowd avoidance	photography tour, autumn guide

Journey → page mapping: Awareness (blog/guide) → Consideration (destination + experience hubs) → Comparison (“best” / “X vs Y” + duration/from-city pages) → Decision (package + cab + stay money pages → Get Quote) → Advocacy (reviews, WhatsApp).

A4. Competitor 360 teardown (grounded in live SERP)

Two competitor tiers own the SERP today:

- National OTAs / aggregators** — Thrillophilia, MakeMyTrip, Yatra, EaseMyTrip, Kesari, Veena World. High domain authority, deep faceted inventory, transparent price tables, big FAQ blocks. Weak on: on-ground voice, temples/rituals/festivals, real local E-E-A-T, cab-route fare depth.
- Srinagar-based local operators** — Indeed Holidays, Nature Connect Travels, Cliffhangers, plus cab specialists. Strong on-ground authority + fare tables + physical office. This is the tier eKashmir must beat on depth + structure while matching local credibility through Sartaj.

Differentiation thesis (information gain + experience gain):

- No competitor combines package + cab-fare + temple/timings + festival + destination depth under one authoritative roof with consistent internal linking. Most silo one vertical.
- On-ground operational truths the OTAs miss — Srinagar taxis can’t do local sightseeing in Gulmarg/Pahalgam/Sonamarg (separate union taxis); Uber/Ola don’t operate in Kashmir; winter needs snow-chains/snow-jeep beyond Tangmarg; Amarnath has Baltal (short) vs Pahalgam (traditional) routes. These “Sartaj tips” are pure information gain and highly citable by LLMs.
- Temple/timing data is inconsistent across the web (Shankaracharya appears as 7 AM–8 PM, 8 AM–5 PM and 7:30 AM–5 PM on different sites). One on-ground-verified source wins the snippet and LLM trust.

A5. SERP & answer-surface targets

Cluster	SERP features to win	Page format that wins it
“Kashmir tour package [+ modifier]”	AI Overview, PAA, sitelinks, price-rich	Package hub + money page w/ price table + FAQ
“best time to visit Kashmir”	Featured snippet, PAA, AI Overview	Pillar guide w/ month table
“Srinagar to Gulmarg taxi fare”	Featured snippet (table), PAA	Cab-route page w/ fare table
“Shankaracharya temple timings”	Featured snippet, PAA	Temple page w/ quick-facts + timings table
“Tulip festival Srinagar”	AI Overview, image pack, Event-rich	Festival page w/ Event schema + dates
“[N] day Kashmir itinerary”	Featured snippet (list), AI Overview	Duration page w/ day-wise table

A6. Topical map (hub-and-spoke backbone)

Maps 1:1 onto the Stage B information architecture. Confirm this map before build.

HOME (primary intent: Kashmir tour package + brand trust)

- └ TOUR PACKAGES [HUB → money]
 - └ By theme → honeymoon · family · group · budget · luxury · adventure
 - └ By duration → 3-10 day/night package pages
 - └ By origin city → from Delhi/Mumbai/Bengaluru/Hyderabad/Chennai/Kolkata/...
- └ DESTINATIONS [HUB]
 - └ Srinagar · Gulmarg · Pahalgam · Sonamarg · Dal Lake · Betaab · Aru · Yusmarg · Doodhpathri · Gurez · Dachigam · Wular
- └ TEMPLES & SHRINES [HUB]
 - └ Shankaracharya · Kheer Bhawani · Amarnath · Hazratbal · Charar-e-Sharief → timings·rituals·dress·reach·history
- └ FESTIVALS & EVENTS [HUB]
 - └ Tulip Festival · Amarnath Yatra · Gulmarg Winter Festival · Saffron Festival · Shikara Festival
- └ CAB & TRANSPORT [HUB → money]
 - └ Srinagar→Gulmarg/Pahalgam/Sonamarg fare · airport transfer · full-day sightseeing · tempo traveller · self-drive
- └ STAYS & HOUSEBOATS [HUB → money]
 - └ Dal Lake houseboats · hotels by town · resorts · homestays · honeymoon stays
- └ EXPERIENCES & ACTIVITIES [HUB → money]
 - └ Shikara · Gondola · skiing · trekking · rafting · paragliding · camping · angling · golf
- └ PLAN YOUR TRIP [PILLAR + blog spokes]
 - └ best time · weather by month · itineraries · cost · packing · safety · permits · food · shopping · connectivity
- └ GLOSSARY → Shikara · Gondola · Chinar · Pheran · Wazwan · Kahwa · Bakarwal · Marg
- └ TOOLS → trip-cost estimator · best-time finder · itinerary builder
- └ TRUST → About · Author (Sartaj) · Reviews · Contact · Policies

A7. E-E-A-T / trust plan

Author entity Sartaj on a real /author/sartaj/ page (bio, 20-yr experience, Srinagar base, photo, sameAs links [CONFIRM]), bylined on every guide. Surface: physical Srinagar office address + NAP; genuine on-page reviews only (then and only then add review schema); J&K Tourism registration [CONFIRM]; WhatsApp/call trust cues at every decision point.

A8. Positioning

“The only Kashmir travel site that plans your whole trip like a local who’s done it for 20 years — packages, cabs, stays, temples, festivals and timings, all verified on the ground, all in one place.”

Demonstrably better via: one-roof completeness, on-ground-verified data, transparent price/fare tables, Sartaj’s first-hand tips, faster mobile UX than the OTAs.

SIGN-OFF GATE

Confirm the topical map (A6) before beginning the Stage B build.

Stage B — Complete Architecture

B1. Information architecture, sitemap & URL taxonomy

Rule: money pages ≤ 2 clicks from home; one URL per intent; lowercase-hyphenated slugs mirroring the silo; breadcrumbs everywhere; mega-menu surfaces all hubs + top money pages.

URL pattern table

Page type	URL pattern	Example
Package hub	/kashmir-tour-packages/	/kashmir-tour-packages/
Package — theme	/kashmir-tour-packages/[theme]/	/kashmir-tour-packages/honeymoon/
Package — duration	/kashmir-tour-packages/[n]-days-[n]-nights/	/kashmir-tour-packages/6-days-5-nights/
Package — from city	/kashmir-tour-packages/from-[city]/	/kashmir-tour-packages/from-delhi/
Destination hub	/destinations/[place]/	/destinations/gulmarg/
Temple	/temples/[name]/	/temples/shankaracharya/
Festival	/festivals/[name]/	/festivals/tulip-festival/
Cab route	/cab-service/[from]-to-[to]/	/cab-service/srinagar-to-gulmarg/
Cab hub	/cab-service/	/cab-service/
Stay	/stays/[type-or-town]/	/stays/dal-lake-houseboats/
Experience	/experiences/[activity]/	/experiences/gondola-ride/
Pillar / guide	/guides/[slug]/	/guides/best-time-to-visit-kashmir/
Glossary	/glossary/[term]/	/glossary/shikara/
Tool	/tools/[tool]/	/tools/trip-cost-estimator/
Trust	/about/ · /author/[name]/ · /reviews/ · /contact/	/author/sartaj/

Migration of existing thin URLs (301 map)

Current	Action
/package	301 → /kashmir-tour-packages/ (upgrade to real hub)
/package/dal-lake-package(edited)	Fix slug → /kashmir-tour-packages/dal-lake/; remove “(edited)” + placeholder copy
/services	Split into /cab-service/, /stays/, /experiences/ hubs; 301 old URL to most relevant
/whyKashmir	301 → /guides/why-visit-kashmir/ (rewrite as guide)
/about, /contact	Keep; add /author/sartaj/ and /reviews/

Navigation

Mega-menu columns: Packages (theme · duration · from-city) · Destinations · Cabs · Stays · Experiences · Temples & Festivals · Plan Your Trip. Persistent header CTA: Get Quote + WhatsApp. Breadcrumb on every deep page. Footer: top from-city pages, top cab routes, top destinations, trust links.

B2. Page-type spec library

Each spec is a build brief for designer + developer + writer. Every money/hub page carries: answer-first block → data table(s) → deep body → FAQ (schema) → sticky Get-Quote CTA.

2.1 Home

- **Role / goal:** Anchor “Kashmir tour package” + brand; route to every hub; drive Get-Quote.
- **Intent:** Navigational + commercial (“kashmir tour package”, “kashmir trip”).
- **Blueprint:** H1 (Kashmir Tour Packages by a 20-yr local, Sartaj) → 40–60-word answer block → featured package cards (theme/duration) → browse-by-duration filter → destinations strip → cab/stay/experience entry cards → why-us → real reviews [VERIFY] → FAQ (8–10) → sticky CTA.
- **UX / CWV:** Hero LCP < 2.5s (optimize Next /image), mobile-first cards, no CLS on filter.
- **CRO:** Primary Get Quote; secondary WhatsApp/Call; trust: 20-yr / Srinagar office / transparent pricing (truthful only).
- **SEO:** Title “Kashmir Tour Packages 2026 | Book with a Local Expert – eKashmir”; one H1; links to all hubs.
- **Schema:** Organization + LocalBusiness (Srinagar NAP) + WebSite (SearchAction) + BreadcrumbList. No AggregateRating unless real reviews.
- **Links:** INTO package hub (primary), across to all hubs; receives sitewide nav links.

2.2 Package hub — /kashmir-tour-packages/

- **Role / goal:** Aggregate all packages; rank head term; funnel to theme/duration/city money pages.
- **Blueprint:** H1 → answer block (what’s included, price range ₹8,999+) → filters (theme · duration · budget) → package cards with price + duration + inclusions snippet → package-type comparison table → “how to choose” body → FAQ → CTA.
- **Data blocks:** Package-type comparison table (theme | days | price-from | best-for | key stops).
- **Schema:** ItemList of TouristTrip/Product+Offer (real prices) + BreadcrumbList + FAQPage.
- **Links:** Down to every package page; across to Destinations + Cab hubs; up-linked from Home + nav.

2.3 Package — theme / duration / from-city (MONEY, core template)

Role / goal: the conversion page for a specific intent (e.g. /from-delhi/, /6-days-5-nights/, /honeymoon/). Rank-and-convert. Content blueprint, in order:

1. H1 = exact intent (e.g. “Kashmir Tour Package from Delhi”).
 2. Answer-first block (40–60 words: price-from, nights, what’s covered, flight note).
 3. Price table — variant | nights | inclusions | price-from | best-for.
 4. Day-wise itinerary table (extractable) — Day | route | stay | highlights.
 5. Inclusions / Exclusions two-column block (name real exclusions: Gondola ₹900–1,400 Phase 1, Shikara ₹300–500/hr, pony/ski rental).
 6. From-city logistics (nearest airport, typical airfare note [VERIFY], best departure timing).
 7. Sartaj’s tips (2–4 on-ground truths).
 8. Map of route (destinations map).
 9. Real reviews [VERIFY].
 10. FAQ (10–15) + Get-Quote form.
- **CRO:** Sticky Get Quote + WhatsApp; price transparency; “customise this” nudge.
 - **SEO:** Title “Kashmir Tour Package from Delhi 2026 | 6D/5N from ₹X”; H2s as questions.
 - **AEO:** Itinerary list + price table target list/table snippets + PAA.

- **Schema:** TouristTrip + Offer (real price) + BreadcrumbList + FAQPage; HowTo optional for itinerary. No fake ratings.
- **Links:** UP to package hub; ACROSS to relevant destination hubs + matching cab-route + stay pages; INTO Get-Quote. Receives links from every destination/temple/festival/guide it relates to.

2.4 Destination hub — /destinations/[place]/

- **Role / goal:** Own “[place] Kashmir” informational + feed packages/cabs/stays.
- **Blueprint:** H1 → answer block → quick-facts box (altitude · distance from Srinagar · best time · famous for) → things to do → how to reach + cab-fare table → where to stay → best time (mini month table) → nearby places → Sartaj tips → map → FAQ → CTA to package + cab.
- **Data blocks:** Quick-facts; how-to-reach/fare table; things-to-do table (activity | duration | cost | season).
- **Schema:** TouristDestination/Place + BreadcrumbList + FAQPage; TouristAttraction for sub-spots.
- **Links:** Across to sibling destinations, INTO relevant package + cab-route + experience + stay pages.

2.5 Temple — /temples/[name]/

- **Role / goal:** Own “[temple] timings / how to reach / rituals”; win featured snippet; feed Srinagar package + cab.
- **Blueprint:** H1 → answer block → quick-facts/timings table (timings · entry · dress code · steps/climb · photography · best time · deity) → how to reach (+ cab-fare) → rituals/darshan + main festival (e.g. Maha Shivaratri) → history → Sartaj tip (on-ground verified timing) → nearby → FAQ → CTA.
- **Example data block (Shankaracharya):** Free entry; ~243 steps; cameras/phones not allowed inside; ~11 km from city centre; modest dress; car parking cut-off ~5 PM; timings [VERIFY on-ground — web sources conflict].
- **Schema:** TouristAttraction/Place + OpeningHoursSpecification (verified) + BreadcrumbList + FAQPage.
- **Links:** INTO Srinagar destination + Srinagar sightseeing cab + relevant package; across to other temples.

2.6 Festival — /festivals/[name]/

- **Role / goal:** Own the seasonal spike; win Event-rich + AI Overview.
- **Blueprint:** H1 → answer block → dates/at-a-glance table (dates [VERIFY yearly] · venue · what happens · entry) → how to attend + where to stay + cab → history/significance → gallery → Sartaj tip → FAQ → CTA (book the package that catches this festival).
- **Schema:** Event (real dates only) + Place + BreadcrumbList + FAQPage.
- **Links:** INTO the seasonal package (e.g. Tulip → spring package) + Srinagar hub + cab.

2.7 Cab route — /cab-service/[from]-to-[to]/ (MONEY)

- **Role / goal:** Own “[from] to [to] taxi fare”; win table snippet; convert to cab enquiry.
- **Blueprint:** H1 → answer block (distance · time · fare-from) → fare table (Sedan | SUV/Innova | Tempo · one-way · round trip) → distance/route/time → included/excluded (AC extra, driver halt, parking/toll) → on-ground rules → Sartaj tip → FAQ → Get-Quote/WhatsApp.
- **On-ground rules:** Srinagar cab can’t do local sightseeing at destination; Uber/Ola unavailable; winter needs snow-jeep beyond Tangmarg.
- **Example fare data [VERIFY 2026-27]:** Srinagar→Gulmarg ~50–65 km, 1.5–2 h, Sedan ~₹2,800–3,000 / Innova ~₹3,700–4,000; Srinagar→Pahalgam ~90 km, Sedan ~₹3,500 / Innova ~₹4,500; Srinagar→Sonamarg ~80 km, Sedan ~₹3,000–3,300 / Innova ~₹3,900; Airport→Dal Lake ~₹700–1,300; full-day Srinagar sightseeing Sedan ~₹1,800–2,500.
- **Schema:** Service + Offer + BreadcrumbList + FAQPage. No fabricated ratings.
- **Links:** UP to cab hub; ACROSS to sibling routes; INTO matching destination + package.

2.8 Stay — /stays/[type-or-town]/ (MONEY)

- **Blueprint:** H1 → answer block → options table (property type | area | price-from | amenities | best-for) → how to choose (houseboat vs hotel; Dal Lake location tips) → Sartaj tip (avoid congested Dal stretches) → FAQ → enquiry CTA.
- **Schema:** LodgingBusiness/Product+Offer (real) + BreadcrumbList + FAQPage.
- **Links:** INTO destination + package + cab.

2.9 Experience — /experiences/[activity]/ (MONEY)

- **Blueprint:** H1 → answer block → facts table (location · duration · price-from · season · difficulty) → what to expect → booking/timing tips (e.g. Gondola pre-book) → Sartaj tip → FAQ → CTA.
- **Schema:** Product/Service + Offer + BreadcrumbList + FAQPage.
- **Links:** INTO destination + package.

2.10 Pillar / guide — /guides/[slug]/ (BLOG spoke)

- **Role / goal:** Own informational head terms (“best time to visit Kashmir”, “N-day itinerary”, “is Kashmir safe”, “trip cost”); win snippet/AI Overview; funnel to money pages.
- **Blueprint:** H1 → answer-first block → jump-link TOC → data tables (month-by-month weather; sample budget) → deep body → Sartaj first-hand tips → FAQ → soft CTA into packages/cabs.
- **Schema:** Article + Person (Sartaj) author + BreadcrumbList + FAQPage; HowTo for itinerary guides.
- **Links:** UP to Plan-Your-Trip pillar; INTO the money pages the guide implies.

2.11 Comparison — /guides/[best-x | x-vs-y]/

- **Role / goal:** Commercial-investigation (“best Kashmir tour operator”, “Gulmarg vs Pahalgam”, “houseboat vs hotel”). Tables mandatory.
- **Blueprint:** H1 → answer block → comparison table → honest verdict → body → FAQ → CTA to chosen money option.
- **Schema:** Article + BreadcrumbList + FAQPage.

2.12–2.14 Glossary · Tool · Trust

- **Glossary /glossary/[term]/:** Definition-first (40–60 words) → context → linked mentions. DefinedTerm + BreadcrumbList. High internal-link-hub value.
- **Tool /tools/[tool]/:** Trip-cost estimator / best-time finder / itinerary builder. Fast, mobile, accessible, SSR shell. Result → Get-Quote. Link magnet.
- **Trust — About / Author(Sartaj) / Reviews / Contact:** Real credentials, Srinagar NAP, Person(Sartaj)+Organization+sameAs. Reviews page uses genuine on-page reviews only — then Review/AggregateRating is allowed. Contact: form + WhatsApp + map.

B3. Super internal-linking matrix

Link taxonomy & rules

Link type	Direction	Rule
Hub → spoke	down	Hub links to every page in its cluster
Spoke → hub	up	Every spoke links back to its hub
Sibling ↔ sibling	lateral	Only genuinely related (Gulmarg ↔ skiing, Pahalgam ↔ Betaab)
Supporting → money	into money	Every destination/temple/festival/guide links into the relevant package + cab page, varied anchor
Hub/pillar → money	into money	Hubs route topical traffic to money pages
Breadcrumb	structural	Every deep page
Contextual in-body	editorial	In real sentences, not footer dumps
Global nav	structural	Money pages ≤ 2 clicks from home

Anchor policy: descriptive + varied (exact + partial + branded + natural); never the same exact-match anchor sitewide; no “click here”.

Sample link matrix (extend to every page)

Source	Target	Anchor (varied)	Type	Purpose
/destinations/gulmarg/	/kashmir-tour-packages/6-days-5-nights/	“6-day Kashmir package covering Gulmarg”	into money	funnel equity
/destinations/gulmarg/	/cab-service/srinagar-to-gulmarg/	“Srinagar to Gulmarg taxi fare”	into money	convert transport intent
/destinations/gulmarg/	/experiences/gondola-ride/	“Gulmarg Gondola ride”	sibling	completeness
/temples/shankaracharya/	/destinations/srinagar/	“things to do in Srinagar”	up/into	route to hub
/temples/shankaracharya/	/kashmir-tour-packages/honeymoon/	“Srinagar honeymoon package”	into money	funnel
/festivals/tulip-festival/	/kashmir-tour-packages/[spring]/	“spring Kashmir tour package”	into money	seasonal funnel
/guides/best-time-to-visit-kashmir/	/kashmir-tour-packages/	“browse Kashmir tour packages”	into money	funnel
/cab-service/srinagar-to-pahalgam/	/destinations/pahalgam/	“Pahalgam sightseeing”	across	relevance

Per-page required-links checklist (attach to every spec): UP to hub/pillar · INTO relevant money page (varied anchor) · ACROSS to ≥ 2 siblings · receives ≥ 1 contextual inbound link · breadcrumb present.

Health checks: zero orphans; money pages get the most inbound links + shallowest depth; anchor diversity verified.

B4. UX / experience architecture

- **Global principles:** clear above-the-fold purpose + CTA; scannable (short paras, tables, jump-links); mobile-first; consistency via a component library.
- **Component inventory (reuse across page types):** header + mega-menu, breadcrumb, hero, package card, price table, itinerary table, fare table, quick-facts box, inclusions/exclusions block, FAQ accordion, review block, sticky Get-Quote bar, WhatsApp button, map embed, gallery.

- **Performance budget:** LCP < 2.5s, INP < 200ms, CLS < 0.1 (optimize Next /image, lazy-load below fold, no layout shift on filters).
- **Accessibility (WCAG AA):** semantic HTML, alt text, contrast, keyboard nav, labeled forms.
- **Persona flow (honeymooner):** Google “kashmir honeymoon package” → theme package page → houseboat stay + Srinagar cab links → Get Quote. No dead ends; decision-stage pages never detour from the CTA.
- **Experience gain vs OTAs:** transparent fare/price tables, on-ground tips, a working trip-cost tool, faster mobile.

B5. Technical & rendering foundation

Requirement	Rule	Why it matters
Rendering	All critical content (H1, answer blocks, tables, FAQs, <a href> links) in server-rendered HTML (SSR/SSG) — Next.js	JS-only content is often unseen by Google/LLM crawlers → kills indexing + citation
Canonical host	www. canonical; 301 non-www; self-referencing canonicals; catch trailing-slash/param dupes	Prevents split equity + duplicate content
Crawl/index	Clean robots.txt; correct meta-robots; real anchor links; XML + HTML sitemaps	Discoverability
URLs	One intent per URL; lowercase-hyphenated; no IDs/dates; fix “(edited)” slug	Clean silo signals
Images	Keep Next /image; add descriptive alt + captions; replace stock with real Kashmir photos where possible	Image SEO + E-E-A-T
Structured data	Validate all schema in CI; truthful types only	Rich results without penalty risk
llms.txt	Root /llms.txt summarizing key pages + verified facts, critical facts in plain crawlable text	LLM consumption + citation
hreflang	Only if a Hindi version launches	Correct i18n

B6. Build roadmap (priority-scored, phased)

Priority = (Search Demand × Intent-to-Revenue Fit × Win Probability) ÷ Effort. Pull seasonal pages forward to land ahead of their spike.

Phase	Build	Why now	Depends on
1 — MVP authority	Home upgrade · Package hub · top theme pages (honeymoon/family/budget) · top duration pages (5N/6D, 6N/7D) · top 3 from-city (Delhi/Mumbai/Bengaluru) · Destinations: Srinagar/Gulmarg/Pahalgam/Sonamarg · Cab hub + 3 core routes · About/Author(Sartaj)/Contact · technical foundation	Core money + proof of topical authority + funnels	Canonical + SSR + topical-map sign-off
1.5 — seasonal pull-forward	Tulip Festival (before late-Mar) · Winter/snow package + Gulmarg skiing (before Dec) · Amarnath (before Jul)	Rank ahead of spike	Phase-1 hubs
2 — cluster completion	Remaining from-city + duration pages · Dal Lake/Betaab/Aru/Yusmarg/Doodhpathri · Stays + Experiences hubs · Temples (Shankaracharya, Kheer Bhawani, Amarnath, Hazratbal) · remaining cab routes · comparison pages · Reviews (if genuine)	Breadth + commercial-investigation capture	Phase 1
3 — authority breadth	Full guide/blog library (best-time, weather, itineraries, cost, safety, food, shopping) · glossary · tools · long-tail	Topical completeness + long-tail + LLM citation	Phases 1–2

B7. Measurement design

KPI	Tracked via	Cadence
Indexation per template	GSC Coverage	Weekly (first 8 wks)
Impressions / position / CTR per cluster	GSC	Monthly
SERP-feature wins (snippet/PAA/local pack/AI Overview)	GSC + manual	Monthly
LLM citations (ChatGPT/Perplexity/Gemini/Claude naming eKashmir)	Manual spot-check of priority clusters	Monthly
Engagement per template	Analytics (scroll/dwell)	Monthly
Money-page enquiries/bookings by cluster	Analytics + CRM/WhatsApp	Monthly

Loop: Weekly = fix crawl/canonical/render + confirm indexation. Monthly = improve weak-CTR titles/metats, add internal links from new content, push page-2 pages. Quarterly = refresh top pages, prune/merge thin/cannibalizing pages, re-run competitor gap, advance next roadmap phase, re-balance links toward money pages.

Appendix — reusable schema stubs

Fill with real, on-page data only. Validate in CI before deploy.

- **Site-wide:** Organization + LocalBusiness (Srinagar NAP, hours, geo, sameAs), WebSite + SearchAction
- **Package:** TouristTrip + Offer{price, priceCurrency:"INR", availability} + BreadcrumbList + FAQPage
- **Cab route:** Service{serviceType:"Taxi"} + Offer + FAQPage
- **Temple / destination:** TouristAttraction/Place + OpeningHoursSpecification (verified) + FAQPage
- **Festival:** Event{startDate, endDate, location} (real dates only)
- **Guide:** Article + author: Person "Sartaj" + FAQPage (+ HowTo for itineraries)
- **Author:** Person{name:"Sartaj", jobTitle, knowsAbout, sameAs}
- **Reviews:** Review / AggregateRating ONLY with genuine on-page reviews

END STATE

Structure + depth + verified data + Sartaj's on-ground voice make Google and every LLM read eKashmirTourPackage.com as the comprehensive Kashmir-travel authority — winning rich results, AI Overviews and citations at maximum CTR, with authority funnelled into the package, cab, stay and experience money pages.
